

**FOUNDATION UNIVERSITY COLLEGE OF
DENTISTRY, ISLAMABAD**

**ANATOMY DEPARTMENT
Student's Study Guide
YEAR: 2025**

MISSION OF DEPARTMENT

Mission

- To educate scholars about anatomical basis of diseases in integration with other basic and clinical sciences at undergraduate and postgraduate level so that they can display excellence in professional growth, academics, research and delivery of medical care to the community.
- To produce dedicated and updated faculty in the field of anatomy.
- To conduct high quality research for publication in impact factor journals.

BROAD OBJECTIVES OF ANATOMY

At the end of the first year, BDS student should be able to know:

- The principles of general histology.
- The basics of general embryology.
- The gross, microscopic and developmental anatomy of head and neck, Brain & Spinal cord.
- The gross anatomy of Thoracic region.
- Histology and development of Respiratory system (uptill trachea) and GIT (uptill esophagus)
- Histology of Endocrine system.

NO OF STUDY HOURS OF SUBJECT

Total weeks= 33

Topics	MIT	Total Hours	Total hours
General anatomy General histology Special histology	LGIS 3 lectures /week=99	33x3=99	99
General embryology Special embryology	SGIS (Demonstration) 3 demo/week=99	99x1.5=148.5	148.5
Neuroanatomy Gross anatomy: - • Head & Neck • Thorax	SGIS (Practical) 1 practicals/week= 33	33x1.5	49.5
Miscellaneous	SDL + Assignments	33 + 40	73
		Total Hours	370

Assessment hours=10+10+10(TERM 1+TERM 2+SEND UP)

Grand total=370+30=400 hours

FACULTY OF DEPARTMENT

Head of department: Prof. Dr. Huma Musarrat Khan

Faculty members:

- Professor Dr. Saadia Rashid
- Dr. Umaima Naveed, Demonstrator
- Dr Laraib Shahid. Demonstrator

Table of Specification for First Term

Total marks=80

Region	Topics	MCQ'S	SEQ's
General Anatomy	Anatomical nomenclature – descriptive terms	8	1
	Bones		
	Joints		
	Muscles		
	Circulatory System		
	Nervous system		
General Histology	Microtechniques	12	
	Cell		
	Epithelial tissue		
	Connective Tissue		
	Cartilage		
	Bone		
	Muscle		
	Skin		
Gross Anatomy(Head and neck)	Skull	20	2
	Cervical Vertebrae (typical & atypical)		
	Cervical fascia.		
	Deep dissection of neck (oesophagus, trachea & great vessels)		
	Anterior triangle of neck		
	Posterior triangle of neck		
	Thyroid gland & prevertebral region		
	Nerves of neck & cervical plexus		
	Lymphatic drainage of head & neck and root of neck.		
	Scalp & Temple.		
	Muscles & arteries of face		
	Parotid region.		
	Mandible & Hyoid bone.		
	Submandibular region.		
	Temporal Region		
	Infratemporal fossa		
	Pterygopalatine fossa		
	Temporomandibular joint.		
	Eyelids, lacrimal apparatus & muscles of orbit		
	Nerves & vessels of orbit & Eye ball		
	External & middle ear.		
	Bony labyrinth and internal ear		
	Larynx		
	External nose, nasal cavity & paranasal sinuses.		
	Later wall of nose		
	Mouth, palate & tongue		
	Pharynx		
Vertebral canal, joints & surface anatomy			
Radiographs

			40

Table of Specification for First Term

(PRACTICAL)

Total marks=40

Station	Educational content	Instructional objectives	marks	Time spent on station	Total marks for each station
1	General anatomy	1) Surface marking from head and neck region	2	2.5 minutes	4
		2) Identify the type of joint, muscle, or bone	2		
2	Gross anatomy	1) identify the marked points on skull/Mandible/cervical vertebrae	2.5	2.5 minutes	4
		2) Identify marked points on radiograph	1.5		
3	Gross anatomy	1) Identify the marked points on ear Model	3	2.5 minutes	4
		2) Question	1		
4	Gross anatomy	1) Identify the marked points on Face Model	2.5	2.5 minutes	4
		2) Question	1.5		
5	Gross anatomy	1) Identify the marked points on larynx Model	2	2.5 minutes	4
		2) Question	2		
6	Gross anatomy	1) Identify the marked points on eye Model	2.5	2.5 minutes	4
		2) Question	1.5		
7	Gross anatomy	1) Identify the marked points on neck Model	3	2.5 minutes	4
		2) Question	1		
8	Gross anatomy	1) Identify the marked points on saggital section of face Model	3	2.5 minutes	4
		2) Question	1		

Station	Educational content	Instructional objectives	marks	Time	Total marks for each station
9	Microscopic histology station	1) Identify the slide and give two points of identification	1+1	2.5 minutes	4
		2) Identify the slide and give two points of identification	1+1		
10	Microscopic histology station	1) Identify the slide and give two points of identification	1+1	2.5 minutes	4
		2) Identify the slide and give two points of identification	1+1		

Table of Specification for Second Term

Total marks=80

Region	Topics	MCQ'S	SEQ's
Histology	Nervous system	10	2
	Circulatory system		
	Lymphoid organs & cells of immune system		
	Respiratory System (uptil trachea)		
General Embryology	Gametogenesis	10	2
	First week of Development		
	Second week of Development		
	Third week of Development		
	Organogenetic Period (4 th to 8 th week)		
	Fetal Period (9 th week to birth)		
	Placenta and Fetal Membranes		
Human Birth Defects			
Neuroanatomy	Skull	20	4
	Meninges & Subarachnoid Cisterns		
	Spinal cord		
	Medulla Oblongata		
	Pons		
	Midbrain		
	Cerebellum		
	Fourth Ventricle		
	Internal capsule & cerebrum		
	Cerebral Lobes (Sulci and Gyri)		
	Lateral Ventricle		
	Cortical areas, white matter		
	Thalamus		
	Hypothalamus		
	Third Ventricle		
	Reticular Formation		
	Basal Ganglia		
	Limbic System		
Blood Supply of brain			
Cerebrospinal Fluid & barrier			
Total	40	40	

Table of Specification for Second Term

(PRACTICAL)

Total marks=40

Station	Educational content	Instructional objectives	marks	Time spent on station	Total marks for each station
1	Neuroanatomy anatomy	1) Identify the marked points on Skull 2) Identify the foramen and name one structure passing through it.	3 1	2.5 minutes	4
2	Neuro anatomy	1) identify the marked points on inferior surface of brain 2) Question	2.5 1.5	2.5 minutes	4
3	Gross anatomy	1) Identify the marked points on scan of brainstem (medulla, pons or midbrain) 2) Question	3 1	2.5 minutes	4
4	Gross anatomy	1) Identify the marked points on sagittal section of brain 2) Question	3 1	2.5 minutes	4
5	Gross anatomy	1) Identify the marked points on brainstem Model 2) Question	3 1	2.5 minutes	4
6	Gross anatomy	1) Identify the marked points on cerebellum and on the structures in the inferior horn of brain 2) Question	3 1	2.5 minutes	4
7	General embryology	1) Identify the marked points on embryo scan 2) Identify the anomaly along with embryological basis	3 1	2.5 minutes	4
8	General Embryology	1) Identify the marked points on embryo Models 2) Question	3 1	2.5 minutes	4

Station	Educational content	Instructional objectives	marks	Time	Total marks for each station
9	Microscopic histology station	1) Identify the slide and give two points of identification 2) Identify the slide and give two points of identification	1+1 1+1	2.5 minutes	4
10	Microscopic histology station	1) Identify the slide and give two points of identification 2) Identify the slide and give two points of identification	1+1 1+1	2.5 minutes	4

OBJECTIVES OF ANATOMY

	Topics	Objectives At the end of session students should be able to:	MIT	ASSESSMENT TOOL
General anatomy	Introduction to Anatomy	<ul style="list-style-type: none"> Define the terms commonly used in Anatomy. Define types of movements, planes and axis Describe the structures met in dissection. 	LGIS/SDL	MCQ SEQ OSPE
	Muscle	<ul style="list-style-type: none"> Classify muscles Describe general features of muscles. 		
	Bone	<ul style="list-style-type: none"> Classify bones Describe general features of bones and types of Ossification Blood supply of bone 		
	Circulatory System	<ul style="list-style-type: none"> Outline general anatomy of Vascular system. Differentiate between different types of vessels 		
	Joints	<ul style="list-style-type: none"> Classify joints Describe the structure, blood supply, lymphatics and movements around synovial joints 		
	Nervous system	<ul style="list-style-type: none"> Describe general features of the Nervous system. Classify the Nervous system. Describe the characteristic features different subdivisions of the nervous system Describe the formation of the Common spinal nerve 		
General histology	Micro techniques	Theory	LGIS/SDL	MCQ SEQ
		<ul style="list-style-type: none"> Describe the steps involved in tissue processing. Explain the functions of different parts of light microscope. Define resolution. Describe the principle and usage of Phase contrast microscope, polarizing microscope, conofocal microscope, fluorescence microscope, transmission electron microscope, scanning electron microscope. 		
		Practical	SGIS	OSPE
	Cell & Nucleus	<ul style="list-style-type: none"> Identify and draw the different parts of microscope and illustrate their usage. Focus the prepared slide at different magnifications 	LGIS/SDL	MCQ

		<p>types of cells.</p> <ul style="list-style-type: none"> Describe the ultrastructure and functions of plasma membrane, mitochondria, ribosomes, endoplasmic reticulum, Golgi complex, lysosomes, proteasomes and peroxisomes of cell. Explain the process of phagocytosis. Explain the process of Signal Reception. Describe the structure and types of cytoskeleton and cell inclusions Describe the ultra structure of nuclear envelope, chromatin and nucleolus. Illustrate cell cycle, and Apoptosis. 		SEQ
	Epithelium	<p>Theory</p> <ul style="list-style-type: none"> Describe specialization of cell surfaces: Basal lamina, basement membrane, intercellular adhesions and junctions, microvilli, stereocilia and cilia. Explain the types of epithelium with examples. Describe Glandular epithelium. Differentiate the structure of serous and mucus secreting cells 	LGIS/SDL	MCQ SEQ
		<p>Practical</p> <ul style="list-style-type: none"> Identify different types of epithelia. Draw a labeled diagram of different types of simple epithelia. Identify Mucous and Serous acini. Draw a labeled diagram of Mucous and Serous acini 	SGIS	OSPE
	<u>Connective tissue</u>	<p>Theory</p> <ul style="list-style-type: none"> Describe different types of cells in connective tissue Describe different types of fibers in connective tissue Discuss various constituents of ground substance Classify various types of connective tissue Describe the histology of different types of adipose tissue 	LGIS/SDL	MCQ SEQ
		<p>Practical</p> <ul style="list-style-type: none"> Identify the microscopic structure of Loose connective tissue, adipose tissue, dense regular and irregular connective tissue Draw a labeled diagram showing the microscopic structure of loose connective tissue, dense regular and irregular connective tissue 	SGIS	OSPE

	Cartilage	Theory <ul style="list-style-type: none"> Describe microscopic features of various types of cartilage 	LGIS/SDL	MCQ SEQ
		Practical <ul style="list-style-type: none"> Identify different types of cartilage microscopically Draw a labeled diagram showing the histological structure of different types of cartilage 	SGIS	OSPE
	Bone	Theory <ul style="list-style-type: none"> Describe microscopic features of bones and types of Ossification 	LGIS/SDL	MCQ SEQ
		Practical <ul style="list-style-type: none"> Identify different types of bone microscopically Draw a labeled diagram showing the histological structure of different types of bone 	SGIS	OSPE
	Muscle	Theory <ul style="list-style-type: none"> Describe the microscopic features of skeletal, smooth and cardiac muscle 	LGIS/SDL	MCQ SEQ
		Practical <ul style="list-style-type: none"> Identify different types of muscles microscopically Draw a labeled histological diagram of different types of muscles 	SGIS	OSPE
	Skin	Theory <ul style="list-style-type: none"> Discuss layers & cells of epidermis & dermis Describe blood vessels & nerves of skin Describe microscopic features of skin appendages 	LGIS/SDL	MCQ SEQ
		Practical <ul style="list-style-type: none"> Identify different types of skins microscopically Draw a labeled histological diagram of different types of skins 	SGIS	OSPE
	Circulatory system	Theory <ul style="list-style-type: none"> Discuss the histology of different arteries, veins and capillaries and lymph vessels 	LGIS/SDL	MCQ SEQ
		Practical <ul style="list-style-type: none"> Identify different types of arteries, veins and capillaries and lymph vessels. Draw a labeled histological diagram of different arteries, veins and capillaries and lymph vessels 	SGIS	OSPE
	Lymphoid tissue	Theory <ul style="list-style-type: none"> Describe the histology and distribution of the cells of the lymphoid system in 	LGIS	MCQ SEQ

		<p>the body..</p> <ul style="list-style-type: none"> Explain the histology of tonsils, thymus, lymph node and spleen 		
		<p>Practical</p> <ul style="list-style-type: none"> Identify palatine and pharyngeal Tonsils, thymus, lymph node and spleen microscopically Draw a labeled histological diagram of palatine and pharyngeal Tonsils, thymus, lymph node and spleen microscopically 	SGIS	OSPE
	Nervous tissue	<p>Theory</p> <ul style="list-style-type: none"> Classify types of Neurons. Outline the microscopic structure of a nerve cell body (Nucleus and Cytoplasm). Describe the microscopic structure of a nerve cell processes. Describe Membrane potential and the process of axon transport (Antegrade & Retrograde). Describe types of Synapses and their histology. Explain the histology of different types of Glial cells. Describe the histology of Meninges. Describe the histology of Choroid Plexus. Describe the microscopic structure of myelinated and unmyelinated nerve fibers. Describe the microscopic structure of Sensory and Autonomic ganglia. Classify Receptor nerve endings. Describe the microscopic structure of different Receptor nerve endings Classify effector nerve endings. Describe briefly the microscopic features of neuromuscular junctions. Illustrate the microscopic structure of Spinal cord, cerebral cortex, cerebellum 	LGIS/SDL	MCQ SEQ
		<p>Practical</p> <ul style="list-style-type: none"> Identify and draw peripheral nerve, spinal cord, sensory ganglia, autonomic ganglia, cerebral cortex and cerebellum 	SGIS	OSPE
SPECIAL HISTOLOGY	Respiratory system	<p>Theory</p> <ul style="list-style-type: none"> Describe the histology of Nasal cavity + Paranasal sinuses. Describe the histology of epiglottis, Larynx, Trachea. 	LGIS	MCQ SEQ

		<p>eyelid</p> <ul style="list-style-type: none"> Identify microscopic slide of retina. Draw a labeled microscopic structure of retina. Identify microscopic slide of cornea. Draw a labeled microscopic structure of cornea. Identify microscopic slide of ear Draw a labeled microscopic structure of ear 		
	<p>General Embryology</p>	<ul style="list-style-type: none"> Describe the historical background of embryology. Define and explain the terms commonly used in embryology. Describe the process of Mitosis & Meiosis and its importance. Describe the process of Gametogenesis: Spermatogenesis and maturation of sperms. Describe the process of Oogenesis, Phases of fertilization. Describe cleavage, formation of Blastocyst&Implantation. Describe the formation of bilaminar germ disc with amniotic cavity and yolk sac. Describe the development of Chorionic sac. Describe the process of Gastrulation and the formation of germ layers. Describe the formation and fate of primitive streak. Describe the formation of Notochordal process and Notochord. Describe the formation of allantois. Describe the process of Neurulation. Describe the formation of Neural plate, neural tube and neural crest cells. Enumerate the derivatives of neural crest cells. Describe the development of Intraembryonic coelom. Describe the early development of CVS. Describe the formation of Primary, secondary and tertiary chorionic villi. Describe the Folding of the embryo in the median plane. Describe the Folding of the embryo in the horizontal plane. Enumerate the derivatives of Germ 	<p>LGIS/SDL</p>	<p>MCQ SEQ OSPE</p>

		<p>layers.</p> <ul style="list-style-type: none"> Describe the highlights of 4th to 6th week of development. Describe the highlights of 7th to 8th week of development. Discuss the various methods of estimating fetal age. Describe the highlights of fetal period. Calculate the expected date of delivery. Describe the factors influencing fetal growth. Describe the development of deciduas. Describe the development of placenta. Discuss the functions of placenta. Describe the development of umbilical cord. Describe the composition, circulation and significance of amniotic fluid. Describe the development of yolk sac and allantois. Describe the types of multiple pregnancies. Define congenital anomalies. Classify and give examples of the types of birth defects. Discuss the common teratogenic agents. Describe the principles of Teratology. 		
SPECIAL EMBRYOLOGY	Skin	<ul style="list-style-type: none"> Describe the embryological origin of skin & its appendages 	LGIS	MCQ SEQ OSPE
	Respiratory System	<ul style="list-style-type: none"> Trace the development of Nasal cavity + Paranasal sinuses. Trace the development of Larynx. Trace the development of Trachea and describe briefly the Common Congenital anomalies. 	LGIS	
	GIT	<p>Describe</p> <ul style="list-style-type: none"> Derivates of foregut with development of oesophagus 	LGIS	
	NEAUROCRANIUM	Describe the Development of Vertebral column & Cranium Explain the etiology of different types of brachycephaly, scaphocephaly & spina bifida in the light of normal development of Neuro-cranium, Viscero-cranium & Vertebral Column		
	CNS	<ul style="list-style-type: none"> Describe the development of Spinal cord, its ganglia and meninges. Describe the positional changes of the 	LGIS	

		<p>spinal cord.</p> <ul style="list-style-type: none"> Describe the process of myelination of nerve fibers with its clinical application Describe the Development of Myelencephalon ,Metencephalon , Mesencephalon, Prosencephalon along with Clinical correlates. Describe briefly the development of cranial nerves. Describe briefly the development of Autonomic nervous system Outline the Pathways of various cranial nerves,trace their nuclei, central connections 		
	Special Senses	<ul style="list-style-type: none"> Describe the development of various layers of eye ball. Describe the development of lens, vitreous body & retina.. Describe the development of external and middle ear and internal ear 	LGIS	MCQ SEQ OSPE
	Head & Neck	<ul style="list-style-type: none"> Development of pharyngeal arches Development of tongue, pituitary and thyroid gland 	LGIS	MCQ SEQ OSPE
GROSS ANATOMY	Brain	<ul style="list-style-type: none"> Describe the salient features and relations of interior of the skull. Describe the attachments, reflections, nerve supply and blood supply of Dura mater, Arachnoid mater and Pia mater. Describe the various sub arachnoid cisterns with the clinical correlates. Describe the gross structure of spinal cord. With Discuss clinical correlates. Describe the anatomical organization of Pain, ,temperature , Touch and Pressure pathways. Describe the anatomical organization of discriminative touch, vibratory and muscle joint sense of positioning With Clinical correlates. Describe the anatomical organization of Joint sense pathways and visceral sensory tracts. Describe the anatomical organization of Descending tracts of spinal cord With Clinical correlates. Describe the superficial vessels on the base of the brain. Describe the gross anatomy of medulla Oblongata. 	LGIS/ SGIS/SDL	MCQ SEQ OSPE

		<ul style="list-style-type: none"> • Describe and draw the anatomical organization of structures present in sections at the different levels • Describe the gross anatomy of Pons. • Describe and draw the anatomical organization of structures present in transverse section at the different levelsthrough Pons. • Describe and draw the anatomical organization of structures present in transverse section at the level through the cranial part of Pons. • Describe the gross appearance, lobes and peduncles of cerebellum • Describe the afferent cerebellar fibers and efferent cerebellar fibers. • Describe the gross anatomy of Midbrain & draw the anatomical organization of structures present in sections at the different with clinical correlates. • Describe the boundaries o f3rd, lateral and 4th Ventricle. • Describe the subdivisions of Cerebrum. • Describe the subdivisions and gross features of Diencephalon. • Describe the general appearance of cerebral hemisphere and main sulci. • Describe the main sulci and gyri on superolateral surface, medial and inferior surfaces,. • Describe the Commissural fibers, Association fibers and Projection fibers, • Identify the various cortical areas and relate their functional significance. • Discuss clinical correlates. • Describe the salient features , nuclei and functions of Thalamus. • Describe the salient features ofHypohalamus, their connections and the functions of Hypothalamus with theclinical correlates. • Describe the boundaries of Third Ventricle. • Describe the various components of the Basal ganglia, • Describe the general organization and functions of Reticular formation • Describe the salient features and functions of limbic system model 	
--	--	--	--

		<ul style="list-style-type: none"> Describe the formation and drainage of CSF Describe the CSF barriers Describe the various blood vessels (superficial and deep) supplying the brain, their course and branches Identify all the structures on the cadaver and model 		
	Thorax	<ul style="list-style-type: none"> Describe the gross anatomy of thoracic cage, muscles and its joints Describe the gross anatomy of mediastinum Enumerate the subdivisions of mediastinum with their contents. Describe the anatomy of lungs Describe the gross features of heart with its blood supply 	LGIS/ SGIS/SDL	MCQ SEQ OSPE
	Head & Neck	<ul style="list-style-type: none"> Skull –I (norma frontalis, occipitalis) Skull – II (norma lateralis) Skull –III (norma basalis) Cervical Vertebrae (typical & atypical). Cervical fascia. Deep dissection of neck (oesophagus, trachea & great vessels) Anterior triangle of neck Posterior triangle of neck Thyroid gland & prevertebral region Nerves of neck & cervical plexus Revision & spotting Assessment Cranial nerves, 9, 10, 11 & 12 Lymphatic drainage of head & neck and root of neck. Scalp, Temple & Face. Deep dissection of face. Parotid region. Mandible. Hyoid bone. Submandibular region. Temporal Region Infratemporal fossa Pterygopalatine fossa Temporomandibular joint. Assessment Eyelids, lacrimal apparatus & orbit Muscles of orbit. Nerves & vessels of orbit & Eye ball External & middle ear. Bony labyrinth and internal ear Larynx-I Larynx-II 	LGIS/ SGIS/SDL	MCQ SEQ OSPE

		<ul style="list-style-type: none">• External nose & nasal cavity.• Later wall of nose• Revision & spotting• Paranasal sinuses• Mouth, palate & tongue• Pharynx• vertebral canal, joints & surface anatomy• Assessment

INTERNAL ASSESSMENT CALCULATION METHOD

1. Internal assessment Theory

Marks obtained (1st Term + 2nd Term + Send-up) = Z

Total Marks (1st Term+2nd Term+Send-up)

Internal Assessment Marks = 10% of Z $\frac{Z \times 10}{100}$

2. Internal Assessment Viva/Practical

a. **Viva + OSE Exam** = **8%**
(1st Term+ 2nd term+send-up+OSE)

b. **Practical Book(2)** = **2%**
